ABOUT KAVAAN

OUR MISSION

Kavaan was founded on a simple observation: plus-size ethnic-fusion wear in India is almost always designed as a percentage markup on a base pattern not as its own design decision.

We build every silhouette from structured kurta jackets to fusion wrap dresses with size-specific pattern engineering from L to 5XL, so fit is a first principle, not an afterthought.

Most plus-size fusion-wear brands take a base pattern designed for a smaller frame and simply widen it – producing a boxy, shapeless "graded-up" silhouette.

Kavaan drafts side-panel darting specific to each size point, achieving genuine waist definition from L to 5XL – the difference between a garment that fits and one that is merely large enough.

Why it matters for acquisition:

Fit-related returns are the single largest driver of return rate in plus-size apparel. A pattern-engineered fit directly reduces this – turning a design choice into a retention and unit-economics advantage.
